

Cat® StepTip Landfill Compactor Tip

Enhances Compaction and Traction

A more heavily compacted landfill is a landfill with a longer life. And that, along with greater traction, wear life and landfill surface integrity, is exactly what the Cat® StepTip Landfill Compactor Tip delivers.

The StepTip is a 7-inch weld-on after-market replacement for the Plus Tip (232-0160) and the Plus II Tip (313-3441). It replaces all tips on any Caterpillar® Landfill Compactor not equipped with cleaner fingers.

CATERPILLAR®

Better Compaction, One Stage at a Time

Increased Surface Area

The unique, broad-based design increases the total surface area of the tip. Compaction occurs again and again at different stages along the tip. And, unlike an even-width tip, the StepTip reduces the paddle effect in which material is disturbed as the tip exits the landfill surface. That means more compaction and less fluffing.

Improved Traction

The same multi-surfaced shape that improves compaction also improves stability. More surface means better engagement with material. The central rib of the tip also increases side-slope traction.

Five tips per wheel have been added to the wheel patterns of the 826 and 836 models, bringing the total number of tips to 30 and 40, respectively. The 816 remains at 20 tips per wheel.

Extended Life

Each tip is formed from two materials. The upper portion is formed from a carbon steel. Its surface is harder than any previous Cat tip, and it is hardened to a greater depth, too. The lower portion is lower carbon-content steel for easy welding to the wheel. At 7 inches tall, the StepTip also provides a significant increase in wear material.

Wear Life Warranty

The CAT StepTip will continue to carry out the 10,000 hour wear life warranty in addition to the new parts warranty against defects in material and workmanship.

World-class Product Support

Cat Dealers offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investments.

Caterpillar Warranty

Caterpillar warrants most ground-engaging tools against breakage during normal operation. If a piece of Caterpillar GET breaks, Caterpillar will replace it at no charge. See your dealer for complete warranty details.
